1 Introduction

Let's begin with the formula $e^{i\pi} + 1 = 0$. But we can also do formulas in *display mode*

$$e = \lim_{n\to\infty} \left(1 + \frac{1}{n}\right)^n = \lim_{n\to\infty} \frac{n}{\sqrt[n]{n!}} = \sum_{n=0}^{\infty} \frac{1}{n!}$$

And with continued fractions,

$$e = 2 + \frac{1}{1 + \frac{1}{1 + \frac{1}{1 + \frac{1}{\cdots}}}}$$
